Natural Feeding Bottle
9oz Slow Flow Nipple

SCF683/17

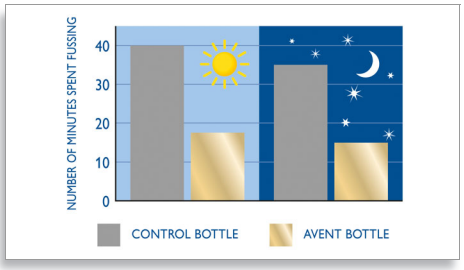
Specifications

Country of origin
• England

What is included
• Natural Feeding Bottle: 1 pcs

Highlights

Significantly reduces fussing



Sleep and nutrition are vital to your baby's health and happiness. A randomised clinical trial was carried out to see whether infant feeding bottle design affects "infant behaviour". The Philips AVENT bottle was shown to significantly reduce fussing by approximately 28 minutes a day as compared to the comparator bottle (46 min vs 74 min, p=0.05). This was especially true during night-time.

Unique anti-colic valve

The two piece anti-colic system consists of the AVENT Nipple and adapter ring. As your baby feeds, the unique skirt on the AVENT Nipple flexes to allow air into the bottle instead of your baby's tummy. Like natural breastfeeding your baby controls the milk flow.

Fits your baby's growing needs

Five different nipple flow rates are available.

0% BPA (Bisphenol A Free)
This bottle is made from PP (Polypropylene) – a BPA-Free material
